

# whao!

## mop

Thanks to its special viscose composition, the WHAO Mop is incredibly absorbent. The long and soft twisted fringes glide and align themselves perfectly onto the floor, thus favoring an accurate and quick action without the slightest amount of effort.

The detergent is released uniformly and the fringes clean thoroughly; even in the most remote corners of your floors.

Whao Mop is indicated for delicate floors such as marble or wood. Unlike the traditional cotton mops, Whao Mop does not emit bad smells.

Composition: hydro-entangled fringes in viscose and polyester.
