

# duster cloths

The special fibers that compose the Super 5 Dust Collector Cloth form an electrostatic force that attracts dirt, dust, lint and hair once it comes into contact with the surfaces, as if it were a magnet.

Unlike the average disposable cloths, Super 5 doesn't move dirt; it really captures and removes it. The Super 5 dust collector cloth is able to trap a greater amount of dirt, including crumbs, thanks to its net-like structure.

Composition: 100% Polyester
